

The 3rd Level Consulting Club Management Tool has hit New Zealand shores.

If you attended the Gymnastics New Zealand 2018 Conference, you would have heard from Frank Sahlein, the director of 3rd Level Consulting. Frank was a gymnastics coach and business owner for 40 years before he used his knowledge and experience to create an online business management system, specific for gymnastic club management, that will now benefit New Zealand clubs.

The tool provides downloadable templates and online courses in the eight key areas of club management:

- Management
- Marketing
- People
- Technology
- Finance
- Facility
- Risk (Safety)
- Inspiration (Leadership)

Access for Gymnastics New Zealand affiliated clubs to 3rd Level Consulting is variable and for 2018, is dependent on the size of your club.

Whilst Frank was in the country, he met with 17 clubs in Christchurch, Wellington and Auckland to explain the functionality of the tool and give some personalised advice relating to some of the challenges clubs are facing. The feedback from the clubs we visited was extremely positive with club managers and administrators seeing huge benefits for them and their staff.

At present, there are 41 affiliated clubs who have access to the templates and courses provided by 3rd Level Consulting. If you haven't yet had a chance to have a look, go to the [3rd Level Consulting website](#) and check it out.

If your club is interested in learning more about this online tool, or are not sure of your club's current level of access, please contact your Gymnastics New Zealand Regional Relationship Manager for more details.

3rd Level Consulting online is used by gymnastics clubs in multiple countries across the world. In this introductory year, we hope to see New Zealand clubs thrive by up-skilling staff on the management courses and using some of the thousands of templates and resources available through your affiliation to Gymnastics New Zealand.
